

1. Corporate Social Responsibility (CSR)

As interior design company we are constantly focused on wellbeing of our clients as only their positive experience will help us grow. Aside from designing responsible interiors we strongly participate in charity events as Kamila Sitak is a member of Rotary Club Białystok.

2. Creating value for Belgian business in Poland

This year we had pleasure to work on the team with two Belgian Companies- Ciril and Delta light. We created the very first residential building Orkana 14 as visitcard of both Belgian companies in Poland. The marriage of Polish design and Belgian quality resulted in beautiful project welcoming future residents into warm, cozy, homy feeling highlighted my specially designed lights which doesn't stand out but only create gentle story. We presented not only international cooperation but also the idea of creating fairytale in which everyone feels welcome.

3. Innovative ways of doing business

We strongly believe in creating coherent world in designing in which from general idea to the smallest detail every thing gives the same calm feeling, which is so needed in modern world. Design for us should be just answer to humans needs, silent partners in everyday struggle and this can't be done without watching every detail and choosing best partners who things the same.
