MJL Application

MJL has been carrying out its tasks on the Polish real estate market for 15 years, we cooperate with a large group of development companies, institutional investors, state institutions. We carry out our tasks based on constant technological development and a focus on searching for pro-ecological solutions in the construction process.

Throughout our history, we have participated in the implementation of numerous projects covered by BREEAM certification, which focuses on multi-criteria assessment of buildings in terms of their ecological performance. We have cooperated with a wide range of assessors and supported the process of assessing construction objects, recently we joined the PLGBC association (Polish Green Building Council), which brings together companies and individuals striving for further development and implementation of pro-ecological solutions within the Polish construction market.

At the same time, we focus on constant development of technology in the implementation process, developing our cooperation, among others, with the Dalux platform, which allows for the digitization of the process and, consequently, the possibility of optimizing the quantity of paper documentation.

We cooperate with a large group of Belgian development companies, strengthening the relationship between Polish and Belgian business. Among our clients we can mention: Matexi, BPI Real Estate, GH Development, Liebrecht & Wood, Equilis, Alides Polska.
